

DECLARATION FOR REISSUE APPLICATION

by Assignee of Joint Inventors

I, Rafael Simon declare that I am a citizen of the United States of America residing at 182 Sterling Street in the City of Hamilton and Province of Ontario;

that I received a Doctor of Philosophy degree in 1996 from University of California at Berkeley and was employed by Zenon two years later;

that I am Chief Operating Officer of Zenon Environmental Inc. (hereafter "Zenon" for brevity), the Assignee of the invention described and claimed in the foregoing specification of U.S. Patent No. 5,639,373, ("the '373 patent") and for which invention I, on behalf of said Assignee, solicit reissue patent;

that all errors which are being corrected in the above-identified reissue application up to the time of filing of this declaration arose without any deceptive intention on the part of the applicants as required by 37 CFR § 1.175 and MPEP §1414;

regarding errors which arose in the original reissue application, I am informed by the inventors and believe that every such error occurred without any deceptive intention on the part of the applicants;

that at the time co-inventors Mailvaganam Mahendran, Carlos F. F. Rodrigues, and Steven K. Pedersen made the invention or inventions, I was not involved with their activities, nor was I closely associated with their activities when a prior reissue application Ser. No. 09/333,669 was filed on 15 June 1999;

09/333,669

that I do not know and do not believe that said invention or inventions was ever known or used in the United States of America or Canada before the invention thereof by said co-inventors;

that said co-inventors made the invention or inventions described and/or claimed in the aforementioned '373 patent when they were employed by the assignee of said '373 patent;

that said Mahendran and Pedersen are currently employed by assignee; that, in addition to the errors which were noted when the '669 reissue application was filed, correction of which errors have resulted in the first reissue application having been allowed with claims to a microfiltration membrane device having the specified limitations, at least one additional error has now arisen which is corrected by the reissue claims submitted herewith;

that the error which has resulted in the filing of the claims herewith arose because it was not realized that the patentees were entitled to claims with the limitations set forth in the claims filed herewith, and arose without deceptive intention, and, all changes in the claims have been made without deceptive intent;

that as a result of this error I believe the original '373 patent to be wholly or partly inoperative or invalid by reason of the claims being either too broad or too narrow, and in particular in not having claims (which are narrowed versions of the original claim 1 or the '373 patent) as submitted herewith.

that the basis for the claims submitted herewith is amply supported in the specification;

I hereby appoint Alfred D. Lobo a member of the Bar of the State of Ohio, and a Registered Patent Attorney, Reg. No. 24,109, with offices at LOBO & CO., L.P.A., 933 The Leader Building, 526 Superior Avenue, Cleveland, Ohio 44114-1401, to prosecute this application and to transact all business in the Patent and Trademark Office in connection therewith.

Address all correspondence to Alfred D. Lobo, using the address given herein.
Address all telephone calls to him at telephone number 216-566-1661.

The undersigned declarant declares further that all statements made herein of his own knowledge are true, and that all statements made on information and belief are believed to be true, and further that these statements are made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon, or any patent to which this declaration is directed.
